

Common Work-plan items

A. Updated review of the robustness of monitored and modeled air pollution impacts - a continuous process

- No particular activity in 2008
- Monitoring data
 - Representativeness for specific water types or region
 - From single dates to year
 - From single biological species to relevant indexes
- Trends
 - From single sites to regions and to continents
- CL calculations
 - From single sites to regions and continents
 - Comparison with monitoring data
- Modeling
 - Use of monitoring data for developing and verifying the models

B. Updated compilation of observed parameters, monitoring methodologies and intensities of effects-oriented activities

- ICP Waters is in the process of revising the Programme Monitoring Manual
- The new Manual will introduce methods for sampling and analyzing HM and POPs in water, sediments and biota

C. Updated summary of effects-oriented activities in Eastern Europe, Caucasus and Central Asia

- Active members (TF, data, intercalibrations)
 - **Belarus**
 - **Russia**
 - **Romania** (intercalibrations)
- Participated in one or some activities, but not in the last 5 years
 - **Moldova**
- Participate at TF meeting for the first time 2007
 - **Ukraine**
 - **Bulgaria**
- Will participate for the first time 2008
 - **Croatia**
